

EXPERIMENT - 1

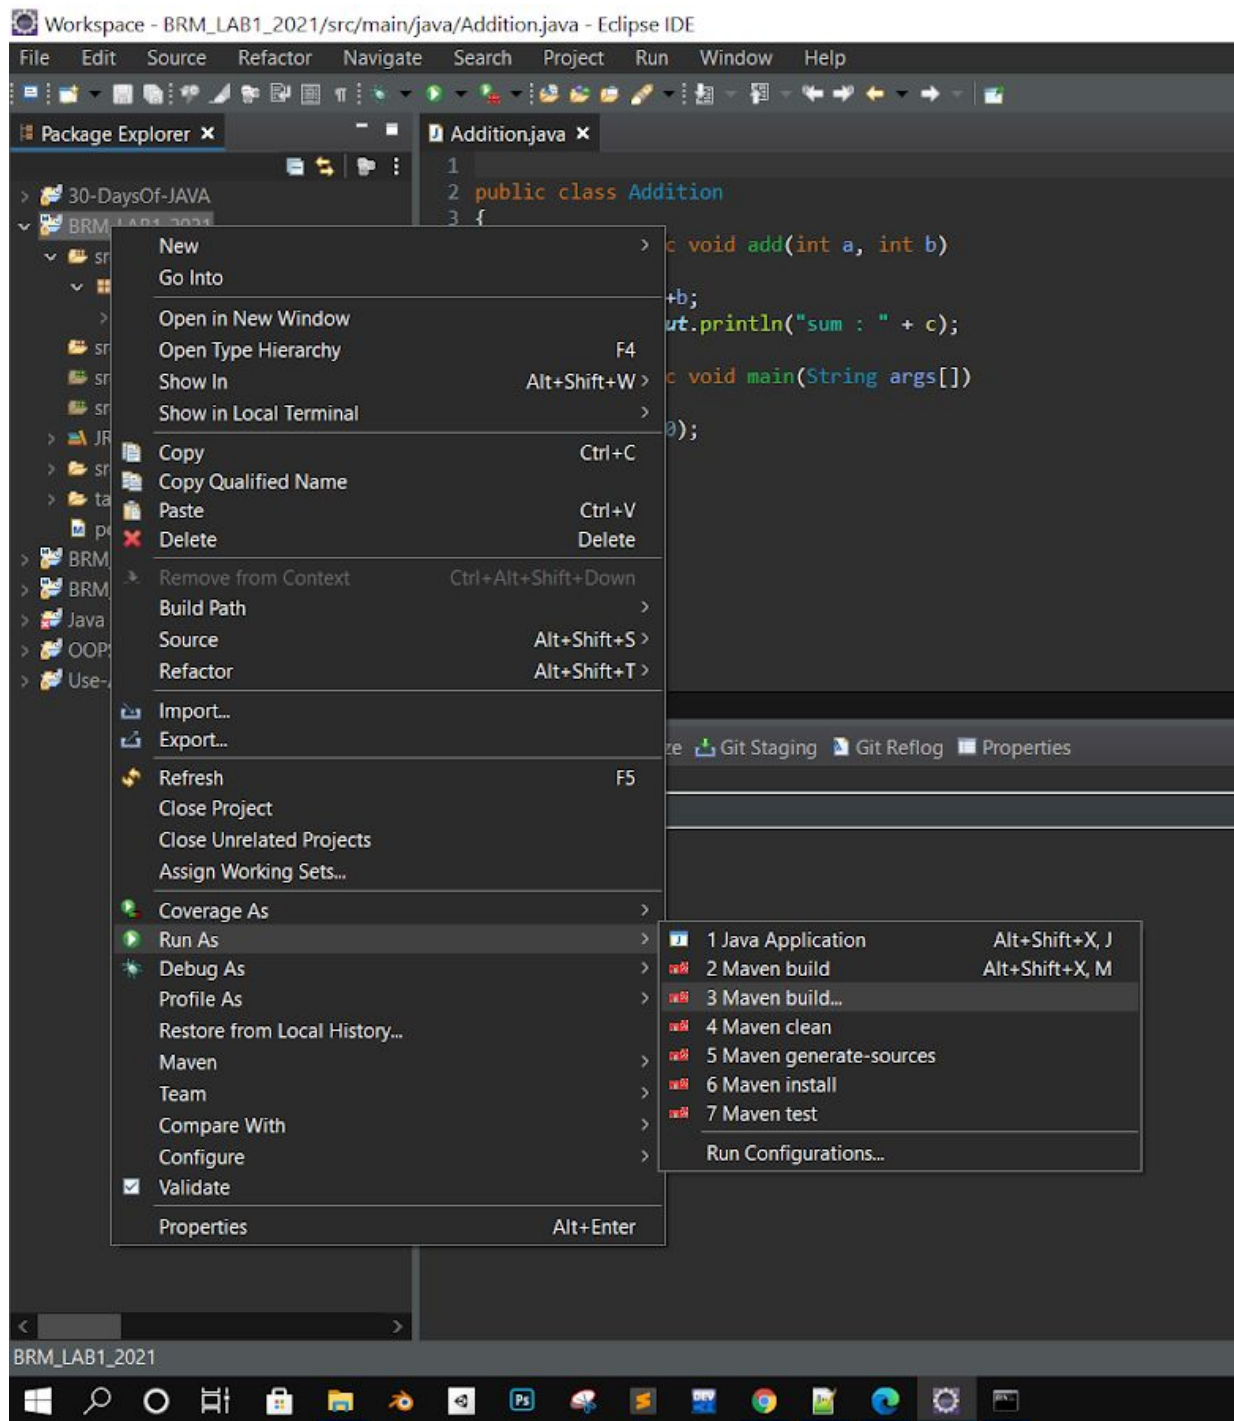

NAME: **SUNNY RAJ**
ROLL NO: **R171219036**
SAP ID: **500075877**
BATCH: **DEVOPS**
SEMESTER: **4**

AIM: Creating 2 maven project and build Configuration both build along with running clean, compile & install commands.

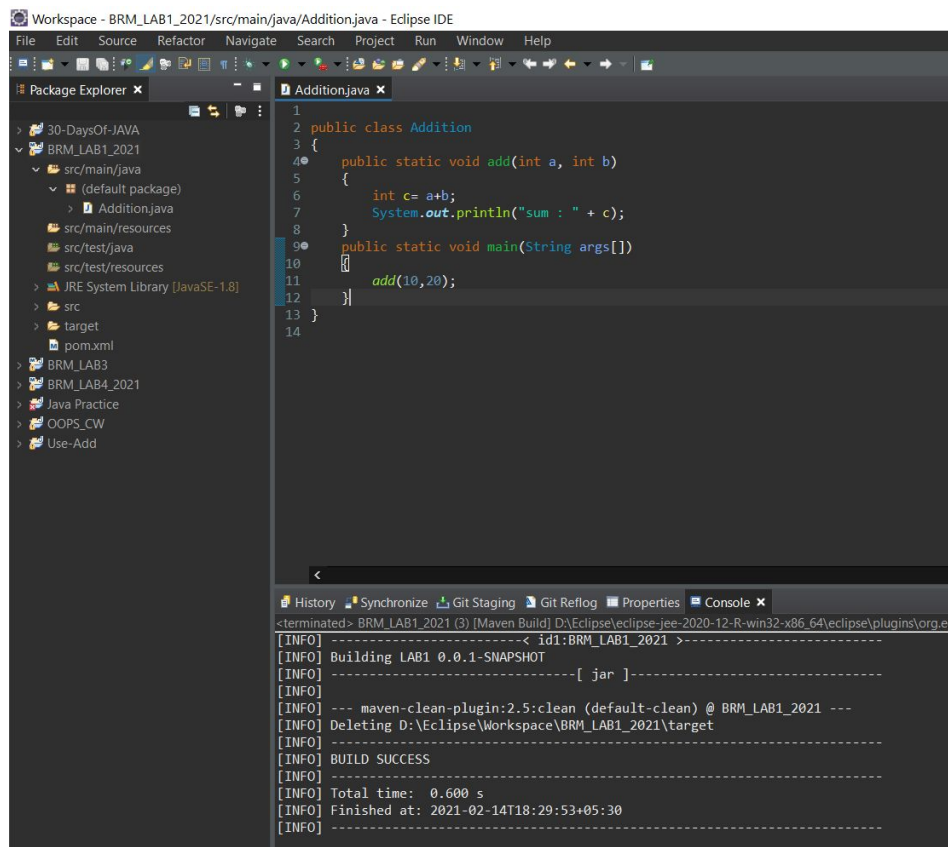

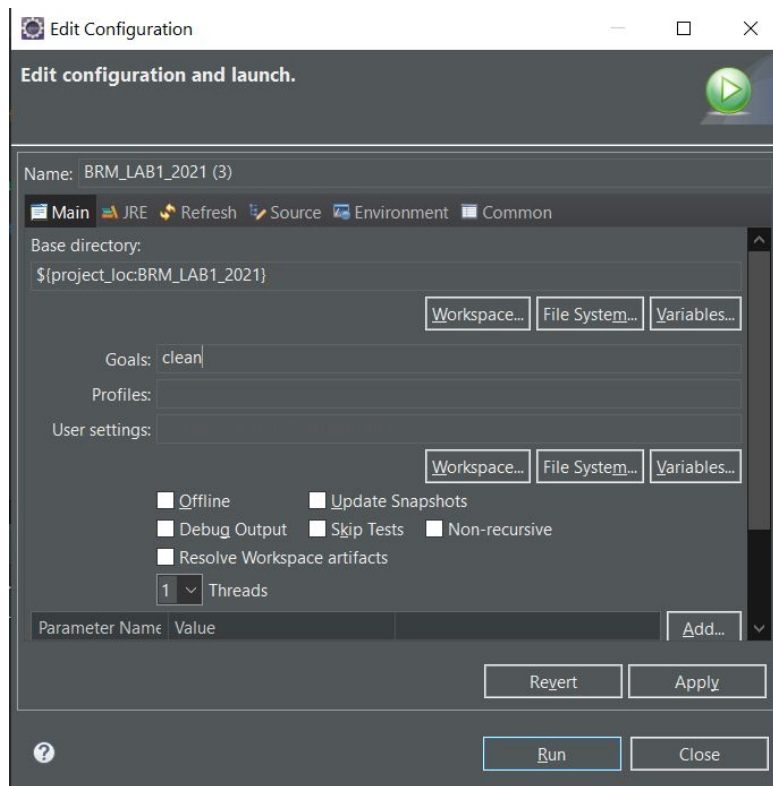

- Created maven project as **BRM_LAB1_2021** and class as **Addition**.

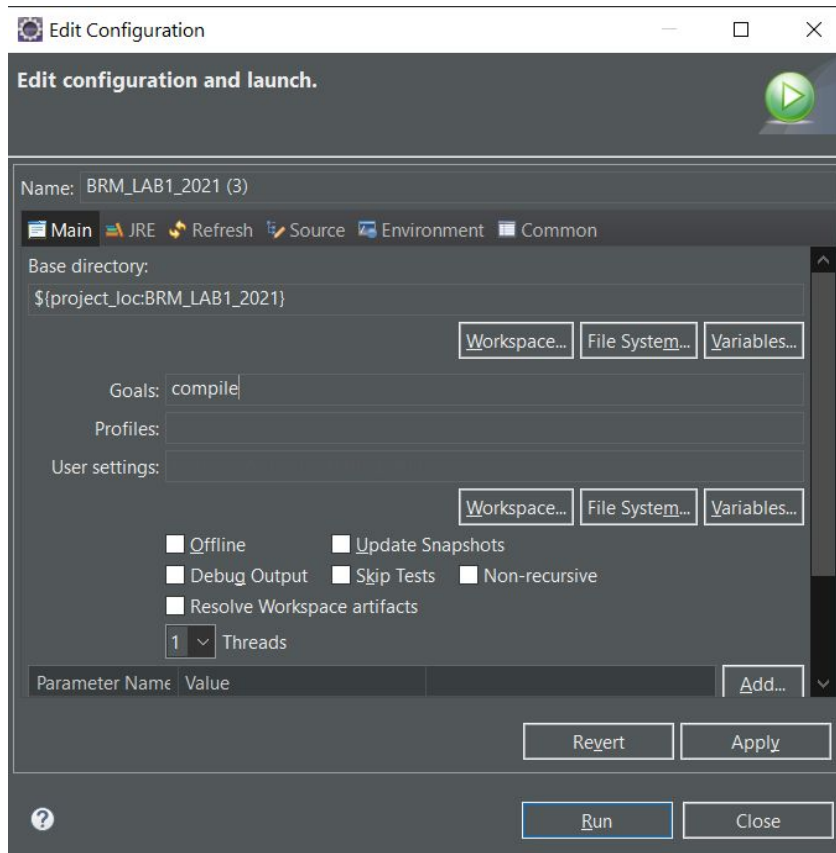

- Now we will Clean, Compile and Install BRM_LAB1_2021

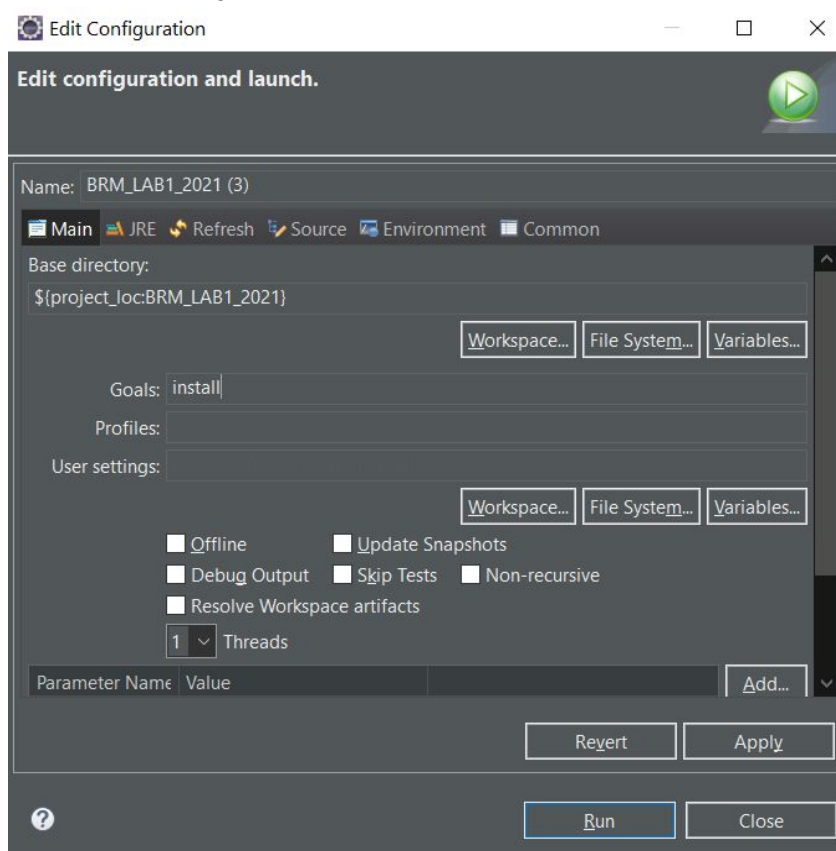

- For Clean Project

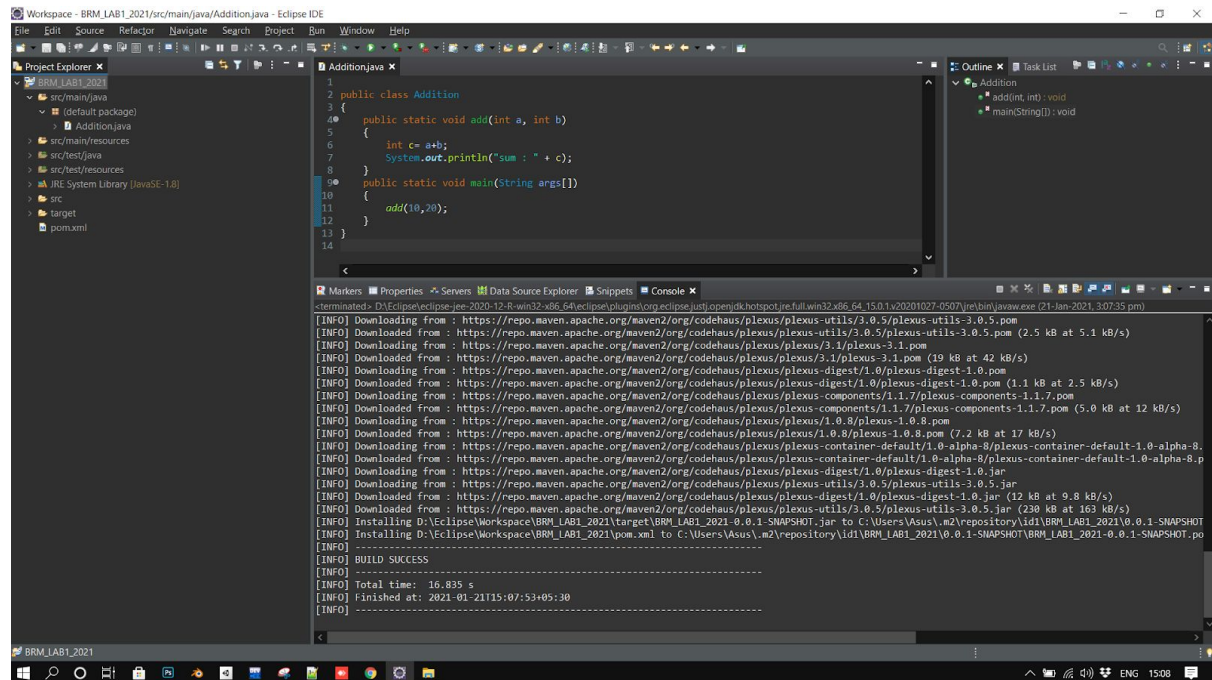

- For Compile Project

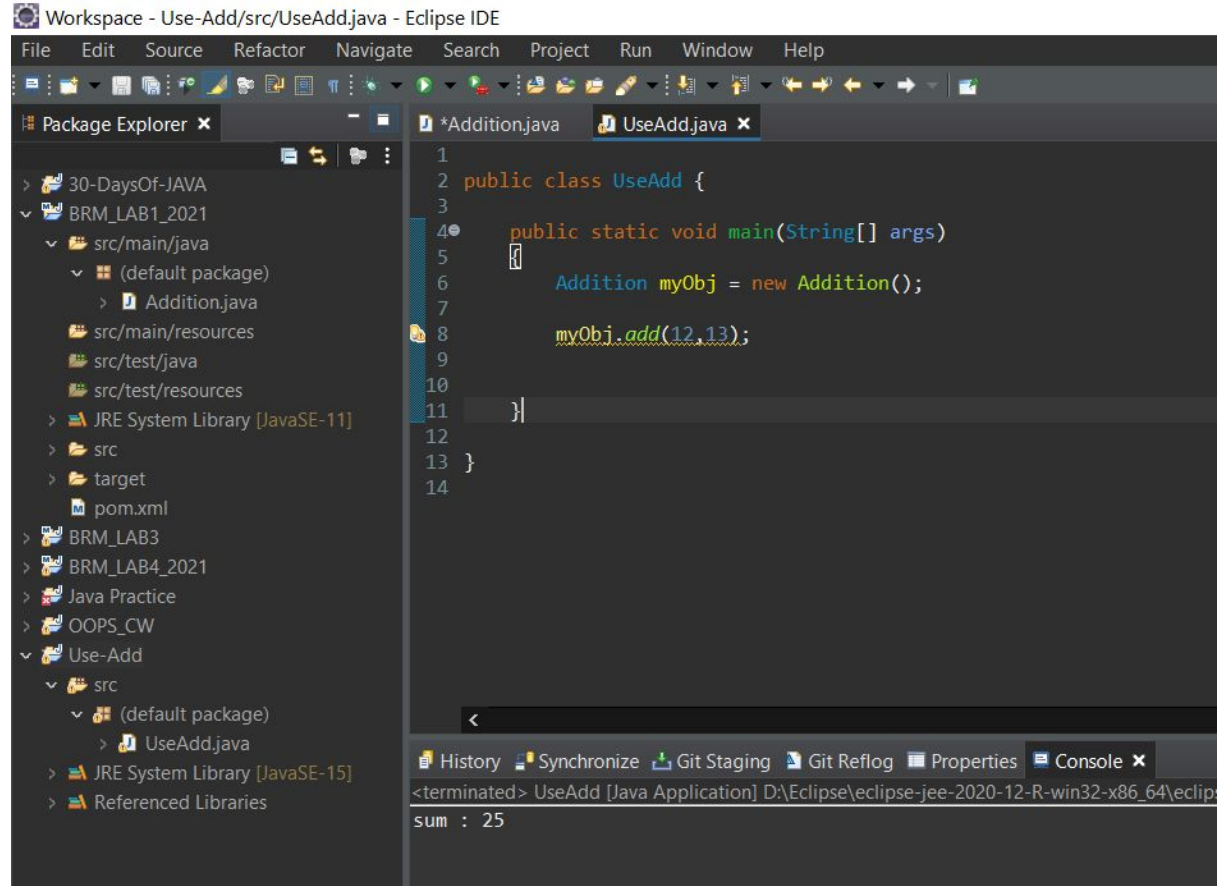

- For install Project

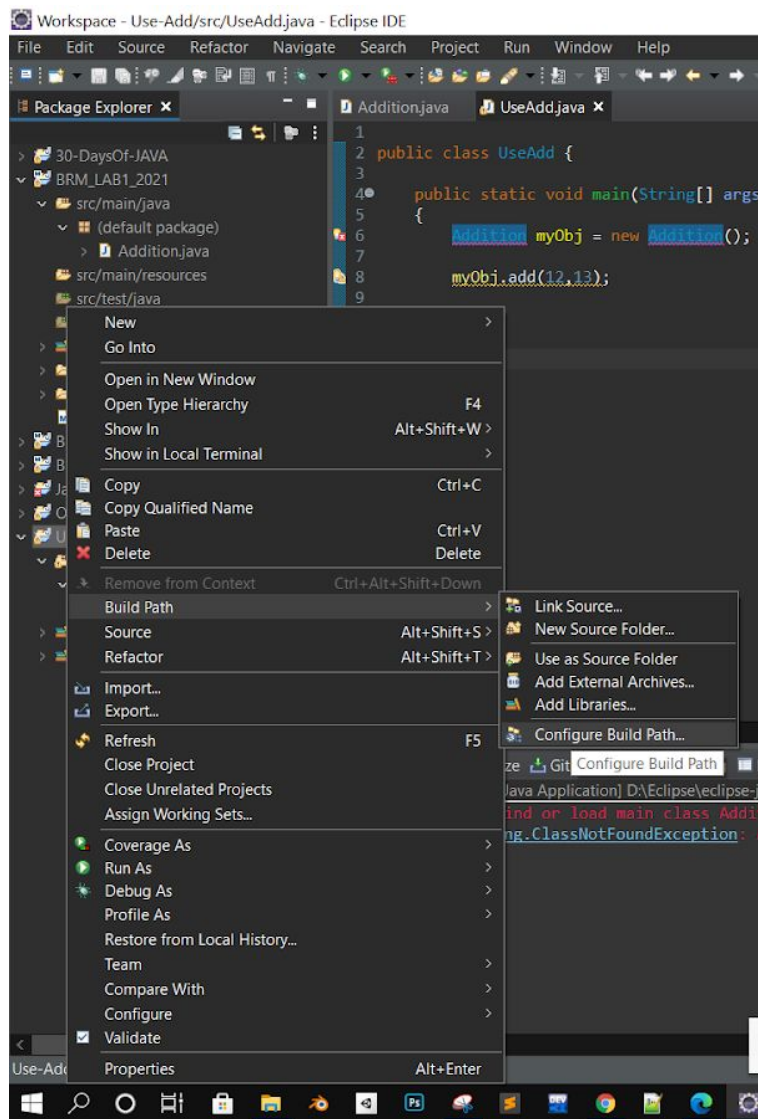

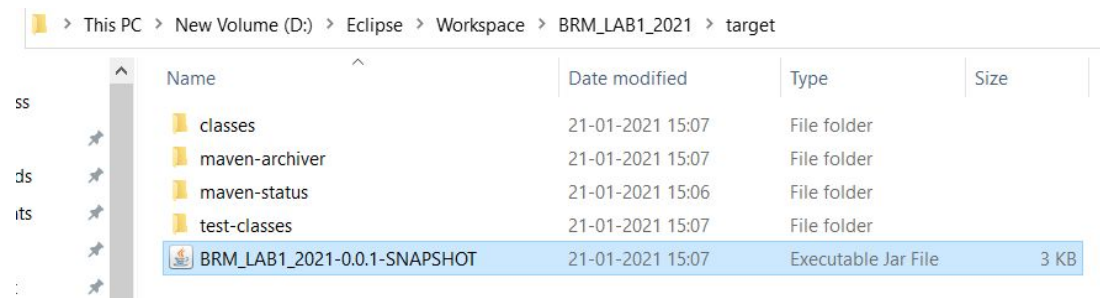

- Now we will create a second project named as Use-Add by creating reference variable.

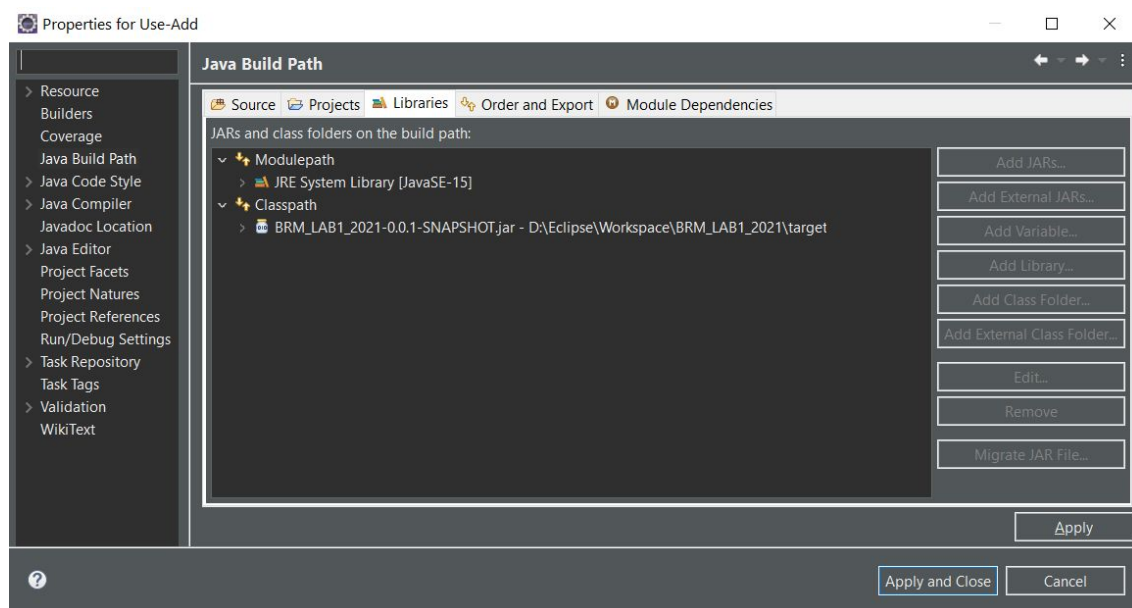

- Now we will right click on Use-Add to build path we will right click >> Build Path >> Build Configuration

- Now we will paste the path of jar file

- Pasted file path of first project in second path

- Now we are all Done with Building path

- Now Run Use-Add
